Welcome to Tracy Aviary! Our grounds span nine acres and we house more than 100 species, so there is plenty to explore. This guide is here to help you, as a chaperone, provide the best experience for your group. There is no need to print a copy of this packet for each individual; instead, you can use the information provided to ask age-appropriate, guided questions about Tracy Aviary’s grounds and birds to make your visit educational and fun for all. To make sure both you and the birds have a fantastic time please go over the Exploration Expectations below before starting your journey. This visit is sure to be a hoot!

-Tracy Aviary’s Education Department

**Exploration Expectations**

- Use inside voices.
- Keep your walking feet on.
- Respect the space of the birds.
- Keep human foods for humans.
- Stay with your group.
**Exciting Explorations**

Use this section to guide your explorations through Tracy Aviary. Below are some suggestions for exhibits to visit and questions to ask your group at those exhibits. Have fun out there, explorers!

**King of the Andes**
Visit Andy and see if you can find him in his habitat! What is he doing? Andy often likes to spread his wings in the sun. He has an 11 foot wing span! How big can you stretch out your arms? See how you measure up at the wingspan chart near the play ribs.

**Sandhill Cranes**
These sandhill cranes are explorers just like you, and they love to search through their habitat for new treasures. Can you walk like a sandhill crane? What do their legs and feet look like? Can you try your hand at pecking the ground to find worms? Use your hand to make a beak and see if you find any treasures!

**Destination Argentina**
Destination Argentina has a wide range of birds including the hard-to-miss flamingo! How many colors can you find on the birds at the Flamingo Pond? Are all the birds the same color? Make sure to look closely – some of the colors are sneaky!

**Owl Forest**
Owls have amazing feathers! What do their feathers look like? What colors do you see? Feathers help birds do many things. Can you think of any ways that feathers help a bird?

**Treasures of the Rainforest**
This exhibit is full of birds and plants of all shapes and sizes. How many different shapes can you find? Be sure to look at both the birds and the plants! Come up with your own shape scavenger hunt to find in this exhibit (Can you find circles? Triangles? Heart shapes?).
### Extraordinary Explorations Scavenger Hunt

Can you find everything on this page? Mark off the boxes as you go!
